# Turning search into a growth system.

**Frozen Bottle · May 2024 → May 2025**

**32,039 to 147,452 monthly organic visits**

## The objective was to build an organic acquisition engine around real business demand.

| 12 months | 4.6× | +195% | 500+ |
|---|---|---|---|
| **Duration** | **Organic traffic** | **Branded search** | **Programmatic content** |
| May 2024 → May 2025 | 32,039 → 147,452 | 24,399 → 72,095 | Articles / city pages |

## How do you make SEO compound instead of treating it as a publishing function?

**OUR STRATEGY -**

- Capture campaign-created demand
- Own product search intent
- Expand city / long-tail coverage
- Create a continuous content loop

# The starting point: 32,039 monthly visits.

The opportunity was to connect existing marketing activity with search behaviour.

May 2024

**32,039**

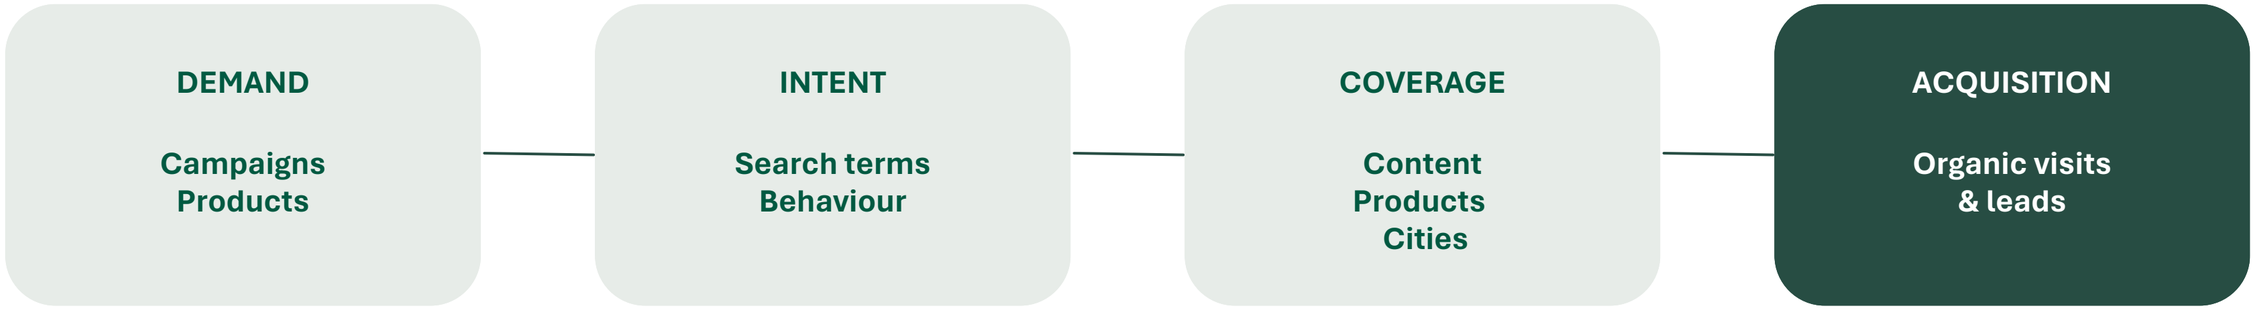

MONTHLY ORGANIC VISITS

OPPORTUNITY AREAS

| | |
|---|---|
| **Campaigns** | Capture emerging demand |
| **Products** | Own transactional + navigational intent |
| **Content** | Build consistent search coverage |
| **Programmatic** | Scale local / long-tail discovery |

# The core idea: create more ways to be discovered.

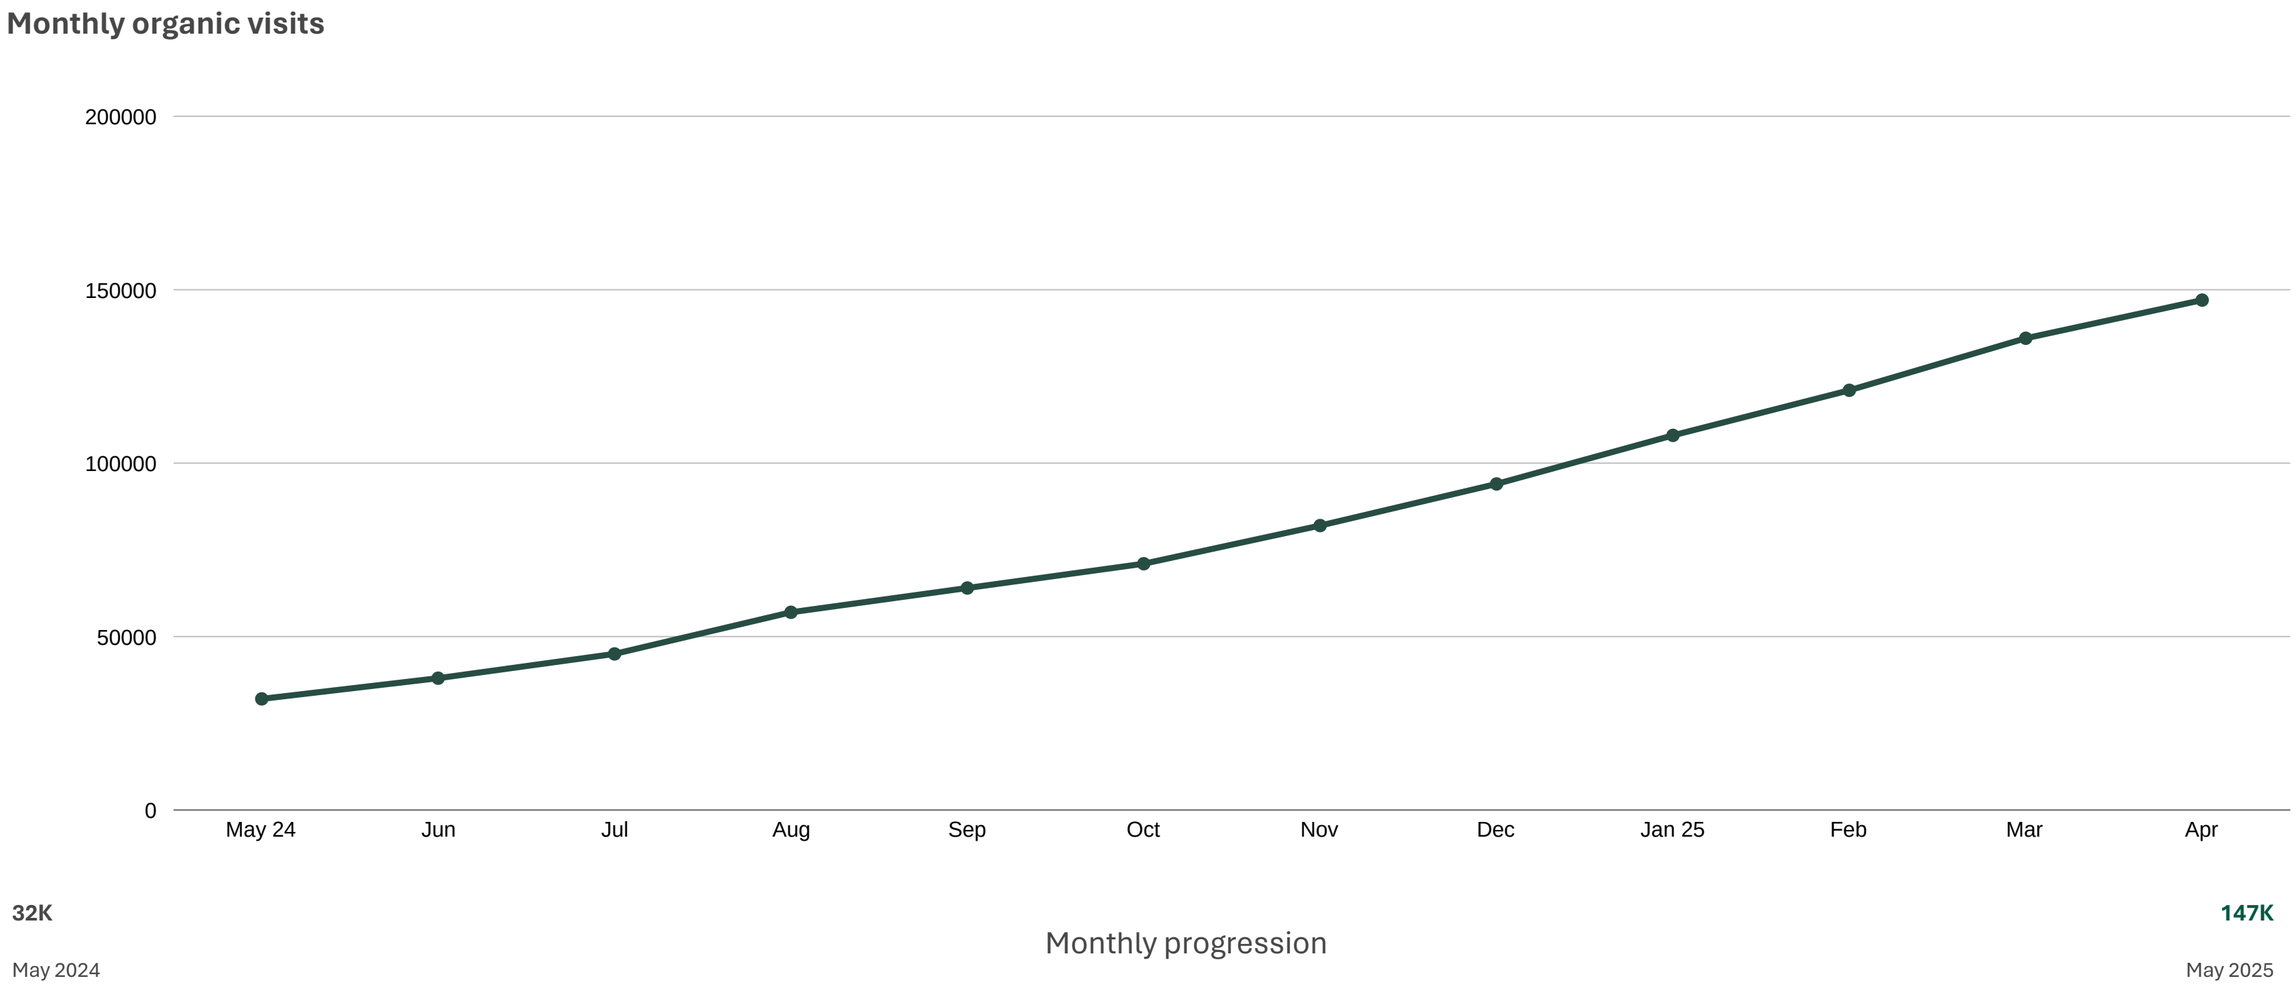

Each new demand signal could become another searchable destination.

**MORE DEMAND → MORE SEARCH COVERAGE → MORE ORGANIC ENTRY POINTS**

This became the operating principle behind the execution

# The traffic curve shows sustained progression.

**32K**

May 2025

# Four systems

This combined demand capture, product intent, scalable coverage and continuous optimisation.

**01** **CAMPAIGN-LED SEO**

Turn promotions and campaigns into search demand.

**02** **PRODUCT SEO**

Create transactional and navigational entry points.

**03** **PROGRAMMATIC SEO**

Scale local and long-tail coverage.

**04** **CONTENT VELOCITY**

Publish consistently and refresh what already exists.

# Campaigns became a source of SEO signals.

Campaign activity was connected to search behaviour instead of stopping at social reach.

**01 CAMPAIGN**

Promotion / social

**02 SEARCH**

People search the offer

**03 CONTENT**

Relevant supporting page

**04 ORGANIC**

Capture ongoing demand

## SEARCH DEMAND EXAMPLES

- Frozen Bottle 99 offer
- Frozen Bottle offer
- Frozen Bottle near me
- Frozen Bottle menu

**The operating principle: campaign → observe demand → create coverage → capture the next search.**

# Product launches became search opportunities.

New products were supported with transactional and navigational keyword opportunities.

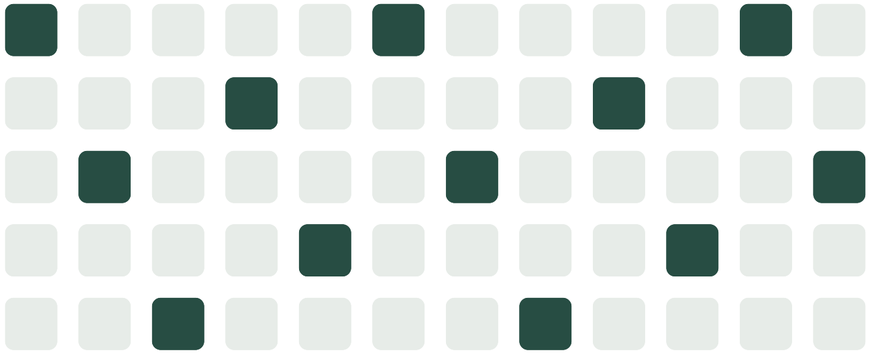

| | |
|---|---|
| NEW PRODUCT | Launch / listing |
| KEYWORD SET | Transactional + navigational |
| LANDING PAGE | Relevant destination |
| DISCOVERY | Organic entry point |

**Product launches were treated as new ways for people to enter the site - Not just catalogue updates.**

# Programmatic SEO changed the scale of coverage.

500+ articles and city-focused pages were published through a scalable framework.

**500+**

programmatic articles / pages

**10-12 / day**

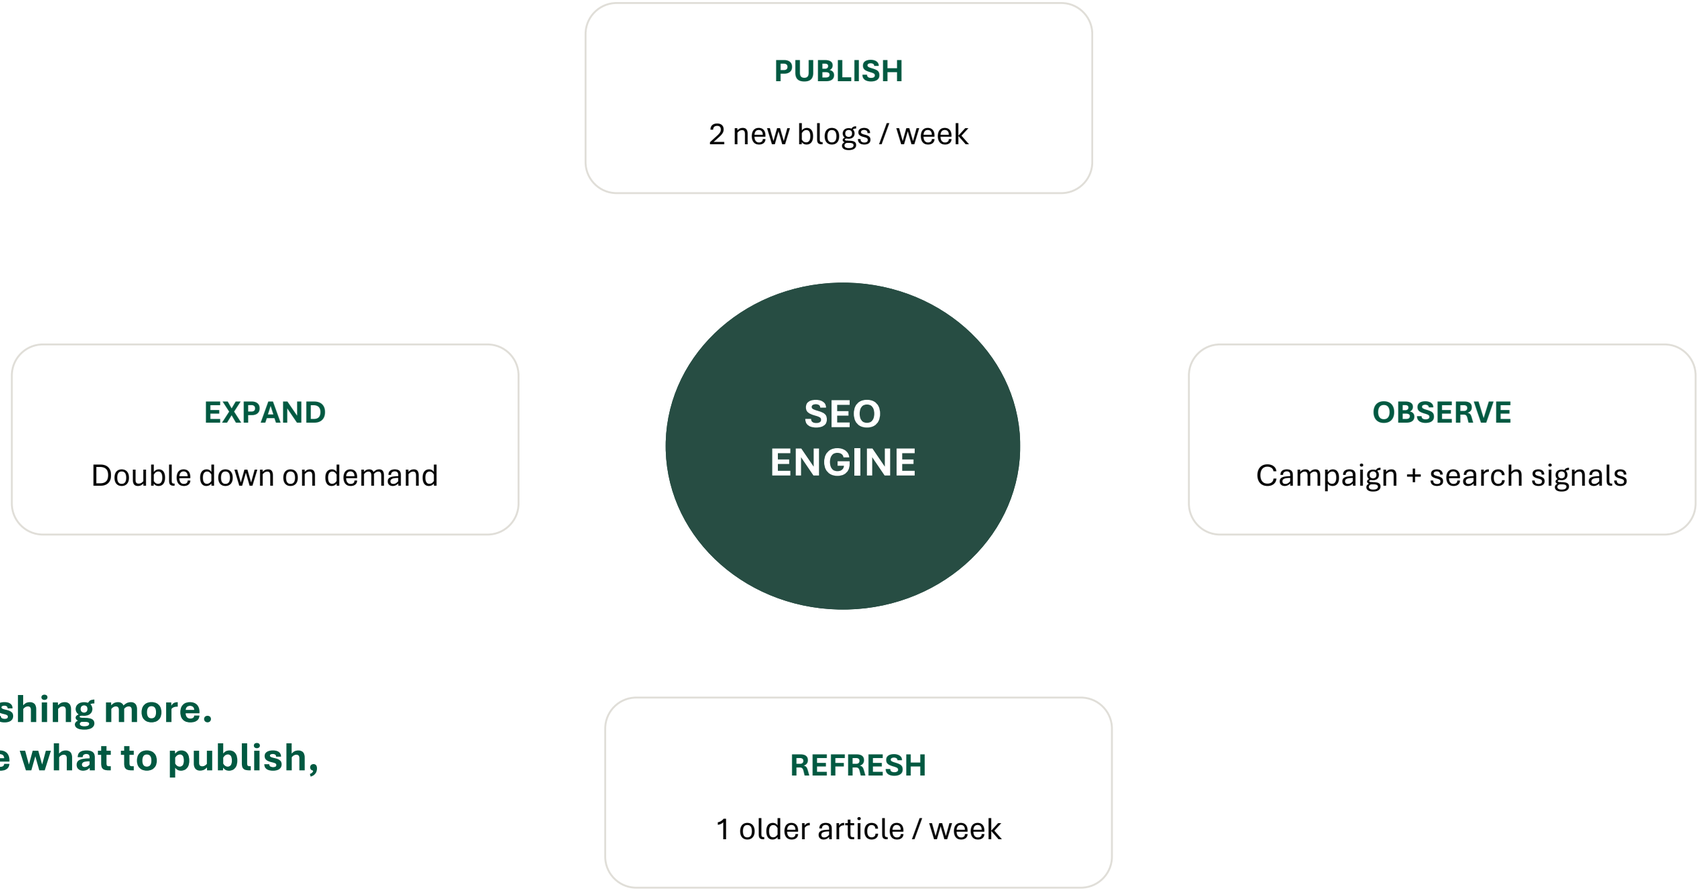

reported organic leads from other cities

SCALABLE PAGE MODEL

- **Template**
- **Location / intent**
- **Publish at scale**

# Content was run as a feedback loop.

The cadence combined new publishing, observation and continuous refresh.

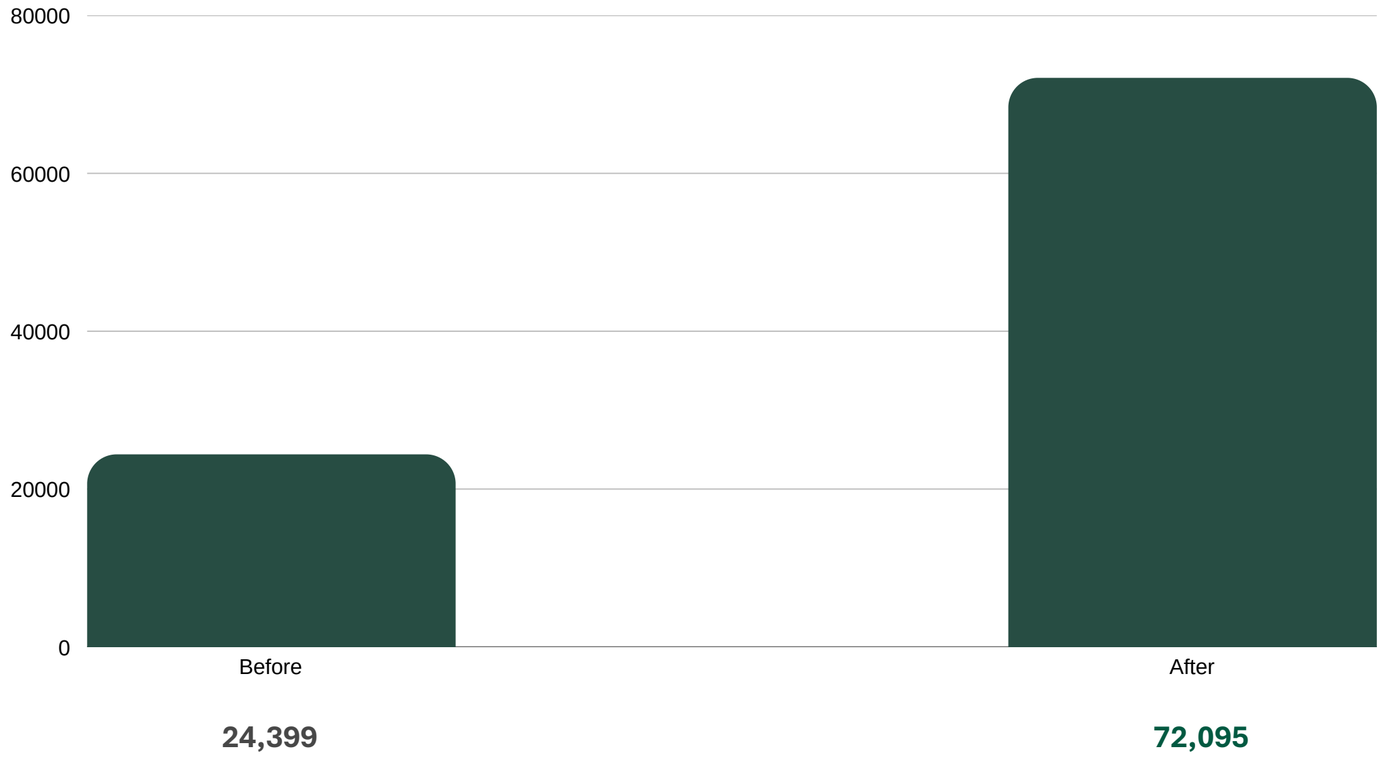

**The important shift was not just publishing more.
It was using each new signal to decide what to publish, refresh or expand next.**

# Branded search demand moved from 24,399 to 72,095.

This was a +195% increase in branded search demand.

**Monthly branded searches**

**+195%**

**branded search growth**

**24,399 → 72,095**

A stronger branded discovery layer.

# Visibility expanded across more than one search surface.

**01**

**AI Overviews**

Answer surface

**02**

**People Also Ask**

Question discovery

**03**

**Featured snippets**

High-visibility answers

**04**

**Branded search**

Direct discovery

This was a 3-4× increase in total search visibility within one year.

# From a content calendar to a demand-response system.

The strongest change was the connection between marketing activity, search behaviour and content execution.

| | | |
|---|---|---|
| **BEFORE** | **Publish content** | Content-first |
| **SHIFT** | **Observe demand** | Signal-first |
| **AFTER** | **Build coverage** | System-first |

**THE FEEDBACK LOOP**

- **Campaigns**
- **Search**
- **Content**
- **Results**
- **Next action**

# The result was a larger and broader organic acquisition surface.

**32,039**
starting organic visits

**147,452**
monthly organic visits

**4.6×**
organic traffic growth

**72,095**
monthly branded searches

**+195%**
branded search growth

**500+**
programmatic pages

**10-12/day**
organic leads

**3-4×**
annual visibility increase

The measurable outcomes reinforce the strategy: traffic, branded demand, scalable coverage and visibility all moved together.

# Why the system was more valuable than any single tactic.

The strategic value sits in the repeatability of the operating model.

1

### Demand sensing

Campaigns and launches revealed what people were actively looking for.

2

### Intent mapping

Search behaviour became the bridge between marketing and SEO.

3

### Scalable execution

Programmatic systems expanded coverage beyond manual publishing.

4

### Continuous optimisation

New content and refreshed content worked as one operating rhythm.

# From search demand to compounding growth.
